Short description of Bucharest-Ilfov Intercommunity Development Association (ADIBI)

ADIBI has been established in 2008 in order to help development of **Bucharest Ilfov Region** and aims to: provide, administrate and develop the cooperation and partnership between the Bucharest City Hall, Ilfov County Council and the County`s localities and other regions, internal and international bodies; to offer information and to present the opportunities about domestic and abroad cooperation with to all interested institutions or individuals; to elaborate eligible projects; to obtain information about the non-reimbursable EU funds to be used for the implementation of a.m. projects.

Associated members are both administrative territorial units of Bucharest – Ilfov Region:

- **The Municipality of Bucharest** – through General Council of Bucharest represented by the Mayor.
- **Ilfov County** – through the Ilfov County Council represented by the President of the County Council.

The organizational structure of ADIBI is made up of 5 specialized compartments that assure the fulfilment of the tasks in each activity domain.

The total number of employees is 14 civil servants, out of which one director.

The budgetary resources of ADIBI are provided from the budget of both associated members and European projects funding.

The purpose of the association is to prepare and promote at all levels, regional development projects that are of common interest for the two territorial and administrative units, in the field of social services, transportation, environment, tourism, innovation, cultural and the business environment. The association also gets involved in obtaining the internal and external financing necessary for the implementation of such projects, in order to implement development projects important at local or regional level, or in order to supply public services and buy equipment for the emergency intervention services/ inspectorates.

ADIBI is member of Magurele High Tech Cluster Project –MHTC – which is a prerequisite for opportunities created by the ELI – NP project for not being wasted due to undeveloped fast enough and sustainable private sector and lack of resources for successfully positioning cluster entities components; product / service innovation generated international markets.
